### **Growth Spurs I/O Software, Inc. to Reach Larger Customer Base**

Arlington, Virginia – **I/O Software, Inc.** has combined forces with Practical Solutions, Inc., a leading identity management company. IO Software, Inc. continues to offer customers the company's award-winning SecureSuite XS™ and SecureTec™ platform products and also provides significantly improved customer service and technical support. I/O Software has facilities in **Arlington, VA, Riverside, CA and Wichita, KS.**

I/O Software products are available immediately through multiple channels, including I/O Software certified-resellers and system integrators, listed on [www.iosoftware.com](http://www.iosoftware.com). The company's product line includes industry leaders such as **SecureSuite XS Workstation™, SecureSuite XS Server™, SecureSuite XS Citrix Module™ and SecureTec AP™.**

Software developers can also leverage SecureSuite's strong authentication in their own applications via the SecureTec 4.51 SDK, which is available by calling 703-738-9267 or contacting [sales@iosoftware.com](mailto:sales@iosoftware.com).

“The growth of I/O Software has been very positive for both the industry and our customers. We are pleased that our customers will continue to be provided the best products and customer service in the industry. I/O Software will continue to develop great products and we are looking forward to offering premier customer service,” said Cindy Nolte, spokesperson.

#### **About I/O Software, Inc.**

I/O Software, Inc. is dedicated to delivering the most comprehensive, flexible, convenient and secure authentication platform to the market. All of I/O Software's products are built on a standardized set of interfaces and services and leverage the most advanced authentication technologies on the market at any time. These technologies include biometrics (such as fingerprint, face, iris and signature identification), Public Key Infrastructure (PKI) based devices, USB tokens and smart cards. I/O Software has successfully integrated its platform with the leading authentication technologies, devices and partners in the industry.

I/O Software is the recipient of numerous awards for its products, which have consistently led comparative reviews. More information is available at [www.iosoftware.com](http://www.iosoftware.com).
